

Geo-Environmental Engineering - GEE 2026

UniLaSalle Rouen, France

May 21-22, 2026

24th Global Joint Seminar on
Geo-Environmental Engineering
Call for abstracts

THEMES

- Remediation of contaminated sites (soils, mining residues and sediments)
- Geo-environmental risk assessment and management
- Bio-sourced materials, eco-materials
- Fate and transport of contaminants
- Climate change and the geo-environment
- Waste and landfill design and management
- Sustainable reuse of solid waste and by-products
- Geosynthetics in geo-environmental engineering
- Ground improvement
- Marine geo-environmental aspects
- Energy geotechnics
- Contribution to global geo-environmental problems
- Lessons from the field and case studies

And other topics on geo-environmental engineering

On behalf of the organizing committee, we are pleased to announce the Call for Abstracts for the GEE2026, to be held in UniLaSalle Rouen, France.

Presenters should visit the official website of GEE2026 for detailed instructions below :

<https://gee2026.sciencesconf.org/>

Abstracts must be written in English using the attached template (1 or 2 pages), which are also available for download from the website. Abstracts can be submitted through the website or via the email address:

daniel.levacher@unicaen.fr. One registration per abstract is required. No full papers will be requested.
